

Benefit from a rapid increase in garment output in Indonesia

Published: December 2012

Exports of garments from Indonesia continue to rise in light of the resurgence of demand from major markets.

Shipments have been increasing consistently over the past decade, with growth become especially pronounced since 2009. Starting that year, the industry has been registering double-digit expansion annually.

The recovery of the US economy is regarded as the main factor driving this development. The emerging trend of establishing a wider reach in the Asia-Pacific region is also a positive contributor.

This report focuses on the main types of garments – casual, formal and baby & children’s wear, and sarongs.
