

Benefit from a rapid increase in wooden furniture and lighting output in the Philippines

Published: March 2012

Environment-friendliness is the buzzword prevailing over the wooden furniture and lighting industry in the Philippines. Suppliers are implementing steps to ensure that products and manufacturing processes meet growing buyer demand for goods that do not adversely affect nature.

Wooden furniture enterprises highlight the fabrication of pieces made of legally harvested wood. Lighting companies place emphasis on certified and energy-saving electrical components. In addition, makers participate in programs aimed at encouraging the creation and consumption of products that are harmless to the ecosystem.

Models also adopt natural materials in addition to wood. These include rattan, bamboo, and various types of fibers such as Manila hemp, buri and banana bark. Marine-based inputs are commonly utilized in lighting.

This report focuses on the main types of wooden furniture and lighting from the Philippines – living room, bedroom, dining and kitchen, garden and outdoor furniture, and lighting.

What you'll get:

- ✓ In-depth profiles of 18 verified suppliers with a comprehensive look at their product and pricing strategy, manufacturing and export capability, product and market focus, verified contact details, and more.
- ✓ 169 full-color images that depict popular export models of wooden furniture & lighting, complete with product descriptions, prices, minimum order requirements and delivery times
