

Benefit from a rapid increase in tablet PC and computer terminal output in mainland China

Published: March 2012

China continues to leverage OEM capability to strengthen its position in the robust computer industry. At present, the hub is the largest manufacturing base for the line, representing more than 80 percent of global output.

Tablet PCs, including the iPad and Android-based variants, are mainly subcontracted there. Own-brand models of the second type are also available. Laptops, however, are still the strongest category in the local sector.

This report covers the major products of China's computer industry, namely tablet and desktop PCs, and other mobile computing devices, and graphics and video cards.

What you'll get:

- ✓ In-depth profiles of 33 verified suppliers with a comprehensive look at their manufacturing and export capability, product and market focus, verified contact details, and more
- ✓ 84 full-color images that depict popular tablet PC and computer terminal export models, with detailed product descriptions and minimum order requirements
- ✓ Supplier information in tabular format to help you compare companies at a glance
- ✓ Results of the custom-designed supplier survey, which forecasts industry trends for the next 12 months
- ✓ An extensive overview of the industry discussing the main challenges facing suppliers
- ✓ An in-depth examination of the supplier base highlighting key characteristics of the different types of companies
- ✓ Details of the primary production centers
- ✓ An update of the latest trends in design, R&D, materials and components
- ✓ A review of the key factors that influence the price and quality of low-end, midrange and high-end products
- ✓ Comprehensive pricing tables featuring export price ranges
